How It Works:

1. Go to the order page here: <http://www.megatao.com/banners> and choose to buy the relevant product through my e-junkie gateway.
2. I will email you a design questionnaire, where you can enter the details of your niche site, colours required, text requirements and any other details that are relevant to the design.
3. You Email the form back and I will produce a first draft of the banner or graphic.
4. Once amendments and changes have been made, I will supply you with the finished logo, the PSD file and a list of CSS colours you can use to customise your site to match the logo (If required).
